PROFILE

Long-lasting cushioning for biomechanically efficient runners who just happen to have flat feet. The new Dyad 5—now with full-length MoGo midsole—offers a neutral base, generous width and volume, and first-feel cushioning for flat footers who don't need motion-control shoes, thank you very much. Orthotics are easily accommodated, and two supportive pods provide passive, but steady stability.

MIDSOLE

- Rearfoot HydroFlow® ST
- Forefoot HydroFlow®
- Full-length MoGo
- Full-length S-257 Cushsole

 **HYDROFLOW® I** Dynamic viscous fluid units for heel and forefoot enhance midsole cushioning—attenuating shock with industry-leading dampening and comfort.

 **MOGO I** Our new midsole compound provides a soft cushy first feel that lasts—without sacrificing stability. In-house and accredited third-party testing showed that in comparison with Substance 257, MoGo offers a 40% increase in cushioning, 22% more energy return, and 33% less fatigue.

 **S-257 CUSHSOLE I** Durable, energy-efficient midsole compound utilized as an insole board for even more cushioning and flexibility.

OUTSOLE

- HPR Plus
- Engineered Cush Pod Configuration
- Blown Rubber Forefoot
- Dual Stability Arch Pod

 **HPR PLUS I** A higher durability, abrasion-resistant rubber outsole compound that wears longer.

 **ENGINEERED CUSH POD CONFIGURATION I** Midsole and outsole components are engineered to set the foot up in an efficient, balanced position from heel strike to toe-off, offering maximum stability and responsiveness.

UPPER

- Ultimate Sockliner
- Air Mesh
- Moisture-managing Element Linings
- Internal Support Saddle
- Microfiber Overlay Materials
- Synthetic Overlay Materials

 **ELEMENT I** Upper technology featuring superior microfiber construction to provide weather protection in a light, supple, quiet fabric that doesn't sacrifice breathability, durability, or comfort.
